   ___________________________________________________________
   ___________________________________________________________

2. Continue Taking?
   Which medications should I keep taking and why?
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

3. Directions For Proper Use?
   How should I take my new medication and how long should I take them?
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

4. Is It Working?
   How will I know the medication is working? Any side effects to watch out for?
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

5. Tests or Follow-Up?
   Any other tests or follow-up needed? Do I need to make the appointment?
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________
   ___________________________________________________________

It’s important to keep an updated medication list and bring it with you to any visits to your doctor or hospital. Remember to include: drug allergies; vitamins or minerals; herbal/natural products; over the counter medications not needing a prescription.
